Rapid Search Kit 1 (RSK1) provides emergency services personnel with a Grab-and-Go visual search system. Built around the revolutionary FirstLook360 wireless spherical imaging camera and rugged IP68 touchscreen tablet, the RSK1 contains all the components and accessories you need for rapid deployment straight out of the box. The chest pack with secure fold-down tablet attachment, MOLLE system, and radio attachment allows use with most existing hydration systems or backpacks. The wireless FL360 camera, when attached to the telescoping handle, gives users a reach of 6'9" or just over 2M. For extended distances, a paint pole adapter is included as well as a 1" eye hook to be attached to a rope, so it can be lowered into spaces. Power is provided by four long-life rechargeable Li-ion protected FL360 batteries and a 10,050 mAh power bank to extend the life of the tablet. This combination will provide up to 10 hours of continuous use. For even longer operations the batteries are hot-swappable and the kit includes a charger with vehicle adapter.
